Subject: Emissions from popping and opening microwave popcorn

09/09/2003 04:40 PM

Dear Ms. Rosati,

I called today and left you a message about my interest in the above titled research you are conducting.

As I told you in my message, I am the Vice President of R&D for Con Agra Foods, Snack Foods Group, in Edina, MN. I have worked her for 13 years and spent much of my time in the direct development of Act II and Orville Redenbacher microwave popcorn.

I recently noticed that you are heading up the IAQ's testing on emissions from popping and opening microwave popcorn. As you can imagine we have information on this topic.

I am going to be in the Raleigh area next week (Tuesday and Wednesday) and was wondering if I could meet with you and your team to discuss your testing and possibly share some idea's on your experiment.

I look forward to hearing from you soon.

Jim Montealegre
