TERRY QUILL, Esq.

Senior Vice President

Product Defense

Washington, DC

202.730.4109

202.833.7057 (fax)

terry.quill@weinberggroup.com

Terry Quill provides risk assessment, risk management, science policy and regulatory advice, and litigation-support services related to environmental, product and health matters. He is a Senior Vice President of the Product Defense Practice Group where he oversees a group of scientific professionals who have advanced degrees in areas such as pharmacology, toxicology, epidemiology, biostatistics, chemistry, bioengineering, manufacturing and controls, compliance, law and regulatory affairs.

Prior to joining THE WEINBERG GROUP, Mr. Quill practiced law for almost 20 years and was a partner in a major US law firm. During that time he gained extensive experience counseling clients on legal and technical matters associated with potential human and environmental exposures to toxic substances. He also counseled clients on science and health policy, risk assessment and risk communication matters. Mr. Quill provided legal services in the areas of environmental, product liability and toxic tort litigation, administrative hearings and appellate challenges to EPA rulemakings.

Mr. Quill has represented corporations, municipalities and trade associations on various legal/technical issues, including issues related to dioxin, PCBs, endocrine disruptors, children's health, chemical mixtures, cancer assessments, other human and ecological risk assessments, and US and international efforts to address persistent organic pollutants. He has extensive experience in assessing the toxicity and environmental fate of dioxins, PCBs and other chemical substances, and is well-versed in the regulatory and political processes concerning dioxin, endocrine disruptors, and the appropriate use of science in the regulatory process.

Mr. Quill serves as Immediate Past President of the International Society of Regulatory Toxicology and Pharmacology, chaired the American Bar Association Committee on Science and Technology, serves on the Board of Directors of the Life Sciences Research Office, and serves on the editorial board of the peer reviewed scientific journal Regulatory Toxicology and Pharmacology. He is a 1988 graduate of the Michigan Law School, received B.S. (1976) and M.S.

(1977) degree in biology from Wayne State University, and an M.S. degree in toxicology (1983) from the University of Michigan.

Prior to his legal career, Mr. Quill conducted research in molecular and development genetics, immunochemistry, tumor immunology, and chemical carcinogenesis. He served as a county toxicologist responsible for addressing community health concerns associated with potential toxic exposure and was responsible for assessing and communicating risk. As a county toxicologist he frequently spoke on community health and toxic exposure issues, briefed community groups and the press and chaired the Michigan state-wide Environmental Toxicology Advisory Committee.
